

NEWSLETTER

A WORD FROM OUR MANAGING DIRECTOR

Dear Readers,

Welcome to the latest edition of the greateyes newsletter!

We are thrilled to share some exciting updates and milestones with you. Our brand-new website has officially launched, offering a more user-friendly and visually engaging platform designed to enhance your browsing experience. We invite you to explore its streamlined navigation and detailed product pages.

We are also making significant strides in constructing our state-of-the-art clean room at the former Berlin Johannisthal airport. The outer shell is now complete, with doors and windows installed, marking a major milestone in this project.

Lastly, don't miss us at SRI 2024 in Hamburg and HCI-21 in the Netherlands, where we'll showcase our latest innovations.

Thank you for your continuous support!

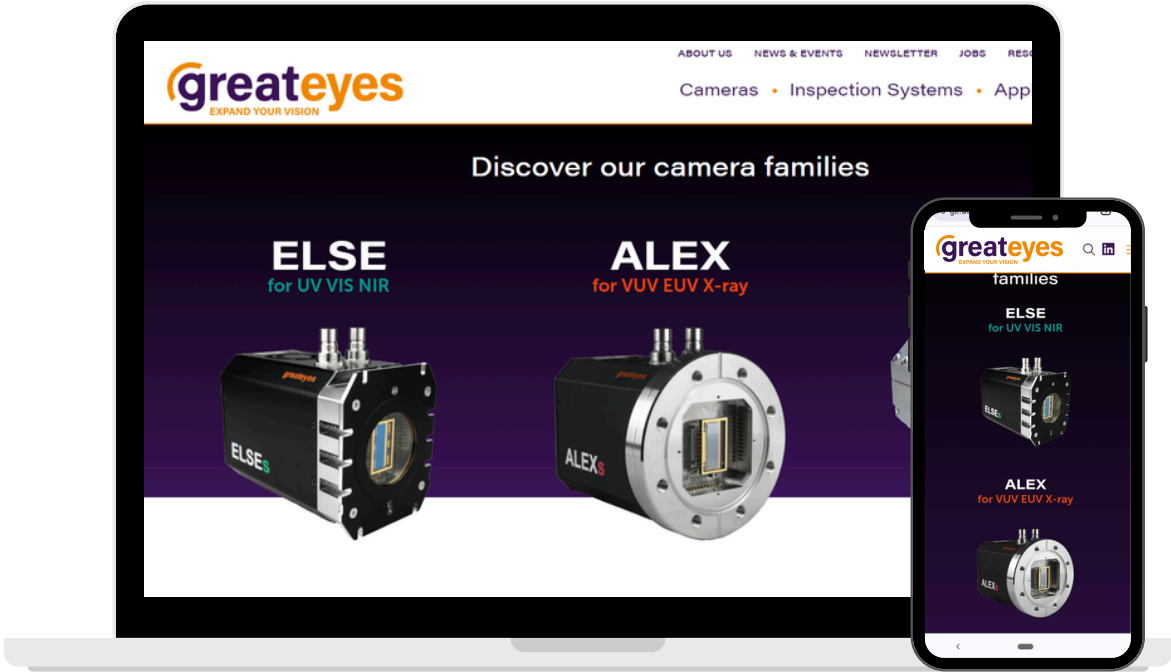

Best regards,

Roman Kemmler
CEO - greateyes GmbH

GREATEYES NEW WEBSITE LAUNCHES

We are excited to announce the launch of the new greateyes website! This revamped digital platform is designed to be more user-friendly, visually engaging, and rich with valuable content. Our aim with this redesign is to offer our customers and partners an improved browsing experience, making it simpler to find the products, services, and resources you need.

The new website features streamlined navigation, allowing you to effortlessly find what you're looking for, and detailed product pages that provide comprehensive information, specifications, and high-quality images to help you make informed decisions.

We invite you to explore the site and see all the enhancements we've made with you in mind. Thank you for your ongoing support, and we look forward to serving you better with this upgraded online presence!

FROM AIRPORT TO INNOVATION HUB: BUILDING OUR STATE-OF-THE-ART CLEAN ROOM AT BERLIN JOHANNISTHAL

To enhance our efficiency, safety, and responsiveness to customer needs, we are constructing a comprehensive clean room facility. Situated in Hangar No. 4 at the former Berlin Johannisthal airport (decommissioned in 1995), this extensive project involves creating multiple rooms with locks, air chambers, and vacuum areas.

Recently, we've completed laying the floor, erecting the walls, and installing the roof. We have also drilled holes for the air supply, power and fiber optic cables, and water connection.

Last week, the air lines were installed on the roof and integrated into the hangar's infrastructure. We are excited to see the next stages of this development!

COMPANY NEWS

Five of our production employees participated in a specialised training course in Stuttgart to prepare for work in our clean room facilities. During the training, they engaged in extensive learning, experimentation, and hands-on practice. Once the clean rooms are operational, they will be fully equipped to meet all requirements to the highest standards.

EURO 2024

Since the Euros were hosted in Germany this summer, we transformed our break room into a cozy viewing area, complete with a TV, to fully immerse ourselves in the excitement of the Euro 2024 Championship.

A big congratulations to Spain for their outstanding performance and ultimate victory in the tournament!
