A WORD FROM OUR MANAGING DIRECTOR

Dear Readers,

Welcome to the latest edition of the greateyes newsletter!

We're excited to share key updates and milestones. Recently, we exhibited at SRI 2024 in Hamburg and the Highly Charged Ions Conference in Egmond aan Zee, Netherlands.

We're also celebrating one year in our new facility, marking an important step in our growth!

Additionally, we're pleased to welcome Max Wunderlich as our new Global Sales Manager. With over 14 years of experience in the photonics industry, Max joined us on September 23rd and has already made an impact!

Lastly, don't miss us at PRORA and the BESSY User Meeting in Berlin later this year.

Thank you for your continued support!

Roman Kemmler
CEO - greateyes GmbH

IN THIS ISSUE

- greateyes: celebrating one year in our new facility
- Meet our new Global Sales Manager, Max Wunderlich
- The latest company news and events

MEET MAX WUNDERLICH

What is your role at greateyes?

I am the new Global Sales Manager for greateyes' cameras and PV-measurement systems.

How long have you been at greateyes?

I joined the team on September 23rd, bringing over 14 years of experience in sales, business development, and product management within the photonics industry.

What does your role involve?

As Global Sales Manager, my role is to support the team in all sales activities, while also working closely with our international sales channels and distributors to drive further growth.

Additionally, I'll be contributing valuable insights on strategic development and best practices, drawing from my extensive experience in the industry.

What do you do outside work?

I recently moved to Berlin and enjoy the vast opportunities the city has to offer in terms of art exhibitions.

I also enjoy home cooking; my chili stew has the power to warm hearts or make you cry - depending on how much heat you can handle!

What led you to work in the field of cameras and inspection systems?

After completing my diploma thesis on photonic metamaterials, I transitioned to the industry as a product manager for optoelectronic components.

This evolved into technical sales and management roles, working closely with academia and R&D teams on advanced imaging systems and optical measurements.

What's your favorite thing about working at greateyes?

Being blessed with a highly dynamic and friendly team. Everyone in the company welcomed me openhearted and is bringing a high level of expertise and motivation.

CELEBRATING ONE YEAR IN OUR NEW FACILITY

greateyes is proud to celebrate one year since moving into our state-of-the-art facility within a historic building at Technology Park Berlin Adlershof – one of Europe's leading science and technology hubs.

This move has enhanced our ability to innovate, collaborate, and expand our operations, placing us at the heart of cutting-edge research and development. The past year has been a milestone in our growth as we invested heavily in both team and infrastructure. With these developments we're more committed than ever to drive advancements in photonics from our new home.

SRI 2024

We had the pleasure of exhibiting at SRI 2024 in Hamburg in August, alongside our sister companies, Photek and Photonic Science.

It was a busy event, where we proudly showcased our high-performance scientific CCD cameras for X-Ray, EUV, and VUV applications, drawing strong interest from attendees.

HCI-21

We attended the International HCI Conference in Egmond aan Zee, Netherlands, where our cameras for highly charged ion research drew strong interest.

Roman Kemmler and Paul McEvoy engaged with researchers at the booth, showcasing how our advanced cameras can support their work.

PRORA

Nov 28-29, 2024
Berlin, Germany

BESSY USER MEETING

December 11-12, 2024
WISTA conference center in Berlin-Adlershof

16TH BESSY@HZB USER MEETING
COUNTRY OF HONOUR 2024: ROMANIA
